

# Viewfinder - oval

You don't have to draw everything!  
Choose a view you like by looking through the view finder and draw that. Perhaps you could secure the viewfinder to the picture with a little Blue Tac. Be very careful not to damage the picture though. (Grown-ups decide on this.)

If the picture is very detailed, you might use the smallest viewfinder. Little detail: the largest one. Just have a look through and see what you think. What view do you feel most confident with?

Turn the picture round too: you can draw things at an angle! Try not to be predictable. Be creative with your art - surprise people!
